

DigitSock™ Supplemental Solution Helping Hand Hygiene

Please begin by following current CDC, WHO, FDA, OSHA, workplace, or facility guidelines and recommendations.

DigitSock™ then adds a physical barrier that is antimicrobial, comfortable to wear and simple for one to normally perform ADLs.

Implementation Steps:

1. Point of access or exit – single site at each location, outside location preferred
 - a. Single use alcohol square, alcohol dispenser, or handwashing (follows current guidelines or practices),
 - b. Instruct wiping skills and recommended guidelines of hand hygiene
 - c. Physical removal similar to washing hands or alcohol rub – in between fingers, circumferentially
 - d. Allow to dry with hands elevated
2. DON in (Do one now). Individual will acquire DigitSock™
 - a. No touch – visual of putting on gloves by WHO – see graphic
 - b. One hand at a time – pull up to forearm
 - c. Touch your finger to your thumb. Adjust
 - d. Repeat on opposite side
3. Mask or eyewear in. Touch mask or eye guards with gloved hand...not bare hands.
4. In facility, no changing of gloves or removal of mask.
 - a. Repeat Step a and b if using restroom facility or exposure event occurs.
 - b. Staff still use reusable or single use PPE gloves or perform hygiene per CDC or WHO guidelines
5. DON out.
 - a. Visual instruction on proper glove removal. Teach skill for all patients/visitors to limit exposure
 - b. Grab outside about ½ inch or 2 cm from end of glove on the forearm side
 - c. Pull over so that the inside is turned out
 - d. Next, hold the inside of removed glove and repeat step 5b and 5c on opposite glove
 - e. Fold together if needed
6. Drop into hamper to be washed and reused
